## Kindergarten and 1<sup>st</sup> Grade – Spanish Immersion

My name is Ana Stark and I teach Kindergarten/First Grade Spanish Immersion. I teach Math and Science and this is my first year at JSIS.

I was born in South America, in the country of Uruguay and I came to the United States when I was 14. Graduated from the University of Utah with a Bachelor Degree in Spanish Literature and then later went to Westminster College to obtain my teaching certificate.

I have been teaching both Spanish and English in Elementary schools for many years. For the past twelve years I taught English as a Second Language in Mount Vernon, WA. to elementary students in grades K-6.

My husband and I love to travel and last year I took a year off to get out there and see the world! I love working with children so I was delighted to be offered a teaching position here at JSIS teaching what I love most: Spanish!

I'm looking forward to a wonderful year teaching and learning. JSIS is such a unique school. I found that teachers and parents go out of their way to help me feel welcome and adjust to a new school/district. Thank you! Gracias!

Call me or email me with questions/concerns and I will get back to you as soon as possible. Adios!
